R&D Money Doesn't Grow on Trees

So, whether you're working in the public or private sectors, for a university or national laboratory, in government or business, it's up to you to find out where the R&D dollars are hiding and how to go about getting them after you've found them.

The books in the Research and Development: AAAS Report Series can help you do this in two ways.

1. Annual R&D Reports—written by experts in the field—explore federal policies, budgetary concerns, the economy, and international and domestic developments as they relate to R&D policy making for the coming fiscal year.
2. Subsequent R&D Colloquium Proceedings—featuring leaders from government, industry, universities, and other parts of the scientific community—give you the texts of presentations, question-and-answer periods, and discussions from annual AAAS Colloquia on R&D Policy.

Order the Research and Development: AAAS Report Series today. In these money-hard times, it's an investment you can't afford to miss out on.

Less is more.

Less Work.

More Dependability.

They're ready-to-use kits with everything you need except your sample. Room temperature set-up, no salting out, no second incubation. We've pre-reacted the first antibody with the second antibody to save you time.

And we've given you NEN quality to assure you of dependable assays — accurate and reproducible. Sensitivity reaches the femtomole range with the acetylating reagents provided. A tritium-labeled marker is included to monitor recovery. The iodinated tracer is exceptionally stable.

These are some of the reasons to choose NEN's Cyclic AMP and GMP [¹²⁵I] RIA kits, the world's most widely used for their convenience and quality. Send for the whole story in our technical brochure.
